INTRODUCTION

Asia and Pacific Bibliography, prepared by the United Nations ESCAP Library, is an annual, computer-produced list of monographs, reports and research papers relating to socio-economic development in Asia and the Pacific.

Asia and Pacific Bibliography consists of four parts: a listing of bibliographic citations, which forms the main body of the bibliography, and three indexes: title, author (including corporate body) and keyword.

Part I contains a list of bibliographic citations arranged by broad subject categories. Each citation, which can be identified by an assigned reference number, includes multiple descriptors (keywords) representing the contents of the publication and a call number by which the publication is shelved in the United Nations ESCAP Library.

Parts II, III and IV contain indexes by title, author (including corporate body) and keyword respectively, providing multiple access to the information contained in *Asia and Pacific Bibliography*. In these indexes, the sequential reference number assigned to each entry in Part I has been used to refer to the full bibliographic description. The keyword index groups the entries under descriptors chosen from the *EBIS* (ESCAP Bibliographic Information System) *Thesaurus*.

It should be noted that *Asia and Pacific Bibliography* contains information on publications acquired by the Library for the previous 12 month period, irrespective of the date of issuance: it might include old titles as well as the most recent ones on Asia and the Pacific. This annual continues *Asian Bibliography*, which was issued as a semi-annual and ending with vol. 47, No. 2 of June-December 1998.

Questions and comments regarding EBIS and *Asia and Pacific Bibliography* may be referred to:
