**STATISTICAL COMPENDIUM ON WOMEN
IN ASIA AND THE PACIFIC**

UNITED NATIONS
New York, 1994

ST/ESCAP/1454

PREFACE

In response to growing demands from government and non-governmental organizations and experts working on women's issues for information including statistics and data on women in Asia and Pacific, ESCAP launched a project titled Women's Information Network for Asia and the Pacific in 1986.

Within the framework of WINAP project, ESCAP started in mid-1993 to collect indicators and statistical data on the status of women in this region and compiled it as a statistical database on the subject. The compilation found its immediate use as a reference for the background papers written in preparation for the Second Asian and Pacific Ministerial Conference to be held at Jakarta from 7 to 14 June 1994. The Ministerial Conference will prepare for the Fourth World Conference on Women to be held at Beijing from 4 to 15 September 1995.

The *Statistical Compendium on Women in Asia and the Pacific* is the outcome of this endeavour. The main sources of the data were international statistics compiled by various United Nations bodies and specialized agencies. Available statistics are published in this compendium for the following ESCAP members and associate members: Afghanistan, American Samoa, Australia, Azerbaijan, Bangladesh, Bhutan, Brunei Darussalam, Cambodia, China, Commonwealth of the Northern Mariana Islands, Cook Islands, Democratic People's Republic of Korea, Fiji, French Polynesia, Guam, Hong Kong, India, Indonesia, Islamic Republic of Iran, Japan, Kazakhstan, Kiribati, Kyrgyzstan, Lao People's Democratic Republic, Macau, Malaysia, Maldives, Marshall Islands, Federated States of Micronesia, Mongolia, Myanmar, Nauru, Nepal, New Caledonia, New Zealand, Niue, Pakistan, Papua New Guinea, Philippines, Republic of Korea, Republic of Palau, Samoa, Singapore, Solomon Islands, Sri Lanka, Tajikistan, Thailand, Tonga, Turkmenistan, Tuvalu, Uzbekistan, Vanuatu and Viet Nam.

The Compendium contains 45 tables covering six major areas: demography; education; health; employment; politics; and international conventions. While tables in first five categories provide numerical data, tables in the last category illustrate the situation of ESCAP member and associate member Governments in respect to the ratification of international conventions referring to women. The data in most cases are presented in five-year intervals starting from 1975 or 1980. This is to highlight the status of women 5 or 10 years before the Nairobi conference held in 1985 and five years or the latest year thereafter. The compendium had to cope with the problem of data availability for specific countries or areas. Therefore, data for some countries appear in many or most of the tables, while data for some other countries are available for only a few series.

It is hoped that this Compendium will be useful for the people who are working on the advancement of women in Asia and Pacific towards the year 2000 and beyond.

These tables were prepared by Mr Edwin Marcelo C. Aguirre, consultant. The Compendium has been published with the generous financial assistance of the Government of Norway.

DEMOGRAPHY	
A1. Estimated total female population (in thousands) and sex ratio (number of women per 1,000 men) in the ESCAP region, 1975, 1985 and 1992	1
A2. Age specific sex ratio (number of women per 1 000 men) in the ESCAP region, 1985 and 1990	2
A3. Estimated total fertility rate in the ESCAP region, 1975-1995	3
EDUCATION	
B1. Estimates and projections of illiteracy in the ESCAP region, population aged 15+ (M = male, F = female)	4
B1a. Illiteracy rate by sex, age group (15+) and by total, urban and rural classification in the ESCAP region, 1980 census round and latest available year	5
B1b. Illiteracy rate by sex, age group (15-24) and by total, urban and rural classification in the ESCAP region, 1980 and latest available year	7
B1c. Illiteracy rate by sex, age group (25+) and by total, urban and rural classification 1980 census round and latest available year	8
B2. Number of female students enrolled at first level and girls enrolled per 100 boys in the ESCAP region, 1980 and latest available year	9
B3. Number of female students enrolled at second level and girls enrolled per 100 boys in the ESCAP region, 1980 and latest available year	10
B4. Number of female students enrolled at third level and women enrolled per 100 men in the ESCAP region, 1980 and latest available year	11
B5. Women's third level enrollment in mass communication, sciences and engineering in selected ESCAP countries and area, latest available year	12
B6. Number of women teachers and women teachers per 100 men at first, second and university levels in the ESCAP region, latest available year	13
B7. Mean years of schooling in the ESCAP region	14
B8. Female enrollment as a percentage of male enrollment in the ESCAP region, 1987-88 and 1988-90	15
HEALTH	
C1. Estimates for female life expectancy at birth and female life expectancy as a percentage of male life expectancy in the ESCAP region, 1980, 1985 and 1993	16
C2. Estimates for maternal mortality rates per 100,000 births in the ESCAP region, around 1980 and latest available year	17
C3. Estimates for infant mortality rates in the ESCAP region, 1975-1980, 1980-85, 1988, 1991 and latest available year	18
C4. Estimated percentage of women aged 15-49 with anaemia in selected ESCAP developing countries, latest available year	19
C5. Estimated percentage of pregnant women with prenatal care and births attended by health personnel in the ESCAP region, latest available year	20
C6. Contraceptive use among married women of reproductive age, by method used in selected ESCAP countries and area, latest available year	21

C7.	Estimated percentage of population with access to safe drinking water, by urban and rural location in the ESCAP region; around 1975, around 1985 and latest available year	22
C8.	Estimated percentage of population with access to health services (1985-92) and sanitation (1988-1991) by urban and rural location in the ESCAP region, latest available year	23
EMPLOYMENT		
D1	Estimates and projections for economically active female population and female activity rate in the ESCAP region, 1980, 1985 and 1990	24
D2.	Economically active population by sex and age group in selected ESCAP countries	25
D3.	Percentage of females in total economically active population by major industry divisions in 1985 and 1990 in selected ESCAP countries	29
D3a.	Distribution of economically active population by major industry groups and sex in selected ESCAP countries	31
D4.	Percentage of females in total economically active population by occupation in selected ESCAP countries and area	33
D4a.	Distribution of economically active population by occupation and sex in selected ESCAP countries and area	35
D5.	Distribution of economically active population by sex and employment status in selected ESCAP countries and areas (M = male, F = female)	37
D6.	Wages in manufacturing by sex in selected ESCAP countries and area	38
D6a.	Wages for women as percentage of men's wages in manufacturing in selected ESCAP countries	39
D7.	Wages in agriculture by sex in selected ESCAP countries, 1980-1990	40
D7a.	Wages for women as a percentage of men's wages in agriculture in selected ESCAP countries	41
D8.	Female unemployment as a percentage of male unemployment in selected ESCAP countries and area	41
D9.	Young (15-24 years) female unemployment rate as a percentage of young male unemployment rate in selected ESCAP countries and area	42
D10.	Adult female (25+ years old) unemployment rate as a percentage of adult male unemployment rate in selected ESCAP countries and area	42
POLITICS		
E1.	Years in which women were given the right to vote and to stand for election in the ESCAP region	43
E2.	Distribution of seats in parliamentary assemblies by sex in the ESCAP region, 1987 and 1993	44
E3.	Status of women in administration, management and politics in the ESCAP region	46
INTERNATIONAL CONVENTIONS		
F1.	ESCAP countries that have signed, ratified or acceded to the Convention on Elimination of All Forms of Discrimination Against Women	47
F2.	ESCAP countries that have ratified ILO conventions relevant to women workers in Asia and the Pacific	48
F3.	ESCAP countries that have signed, ratified or acceded to the International Convention on the Elimination of All Forms of Racial Discrimination	49
F4.	ESCAP countries that have signed, ratified or acceded to the Convention on the Political Rights of Women	49
F5.	ESCAP countries that have signed, ratified or acceded to the Convention for the Suppression of the Traffic in Persons and of the Exploitation of the Prostitution of Others	50
F6.	ESCAP countries that have signed, ratified or acceded to the Convention on the Nationality of Married Women	50

EXPLANATION OF SYMBOLS

Three dots (...) indicate that data are not available or are not separately reported.

A dot (.) means that the item is not applicable.

A hyphen (-) between dates representing years, e.g., 1985-1990, is used to signify the full period involved, including the beginning and end years.

A dash (_) indicates that the amount is nil or negligible.

A slash in between two dots (./) indicates that the data are included elsewhere with another category.

DEFINITIONS

DEMOGRAPHY

Sex ratio. The proportion of females to males in a population as expressed by the number females per thousand males.

Total female population. Total female population shown are midyear estimates or are averages of year-end estimates.

Total fertility rate. Average number of children that would be born alive to a woman during her lifetime if she were to bear children at each age in accordance with prevailing age-specific fertility rates.

HEALTH

Births attended. The percentage of births attended by physicians, nurses, midwives, trained primary health care workers or trained traditional birth attendants.

Contraceptive use among married women. Contraceptive prevalence for married women of reproductive age and their partners, although there are exceptions (footnoted accordingly). The "married" group usually includes those in consensual unions in societies where such unions are common. Differences in marital status composition present a problem for the comparability of data.

Variations in the age ranges of the women covered by the different sources of the data also limit the comparability of contraceptive-use data. Data for developing countries usually cover women aged 15-49, but in a substantial number of cases the data cover women aged 15-44. There is more variation in age ranges for developed countries. Few of the surveys include women older than 45, and in some the cut-off age is even lower. A few samples are defined by time of marriage rather than by age, and these focus on marriages averaging fewer than 10 years. Since contraceptive use typically falls with increasing age after the age of 35 or 40, prevalence estimates based on age groups 15-44 may be one to three percentage points higher than those based on age groups 15-49. Prevalence of particular methods is more seriously affected, particularly for those methods whose use varies sharply with age.

Health services access. The percentage of the population that can reach appropriate local health services on foot or by local means of transport in no more than one hour.

Life expectancy at birth. Number of years a new-born infant would live if prevailing patterns of mortality for all people at the time of birth were to stay the same throughout their life.

Infant mortality rate. Annual number of deaths of infants per 1 000 live births in the same year. Deaths excludes foetal deaths.

Maternal mortality rate. Annual number of deaths of women from pregnancy-related causes per 100 000 live births in the same year.

Prevalence of anaemia. The percentage of subjects with a haemoglobin concentration below the WHO norm - 120 grams per liter (at sea level) for adult non-pregnant females and 110 grams per liter for adult pregnant females.

Safe water access. The percentage of the population with reasonable access to safe water supply, including treated surface water, or untreated but uncontaminated water such as that from springs, sanitary wells and protected boreholes.

Sanitation access. The percentage of the population with access to sanitary means of excreta and waste disposal, including outdoor latrines and composting.

EDUCATION

Illiteracy. The inability to read and write. People who are semiliterates - those who can read but cannot write are included in estimates of illiterates.

Mean years of schooling. Average number of years of schooling received per person age 25 and over

Primary education. Education at the first level (International Standard Classification of Education [ISCED] level 1), the main function of which is to provide the basic elements of education, such as those imparted in elementary schools and primary schools.

Secondary education. Education at the second level (ISCED levels 2 and 3), based on at least four years' previous instruction at the first level, and providing general or specialized instruction or both, such as those imparted in middle schools, secondary schools, high schools, teacher-training schools at this level and schools of a vocational or technical nature.

Student. A person enrolled in a school for systematic instruction at any level of education.

Teacher. A person directly engaged in instructing a group of pupils (students). Heads of educational institutions, supervisory and other personnel are counted as teachers only when they have regular teaching functions.

Tertiary education. Education at the third level (ISCED levels 5, 6 and 7), such as universities, teachers' colleges and higher professional schools - requiring as a minimum condition of admission the successful completion of education at the second level or evidence of the attainment of an equivalent level of knowledge.

EMPLOYMENT

Employee. A person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, piece-rates or payment in kind.

Employer. A person who operates his or her own economic enterprise or engages independently in a profession or trade and hires one or more employees.

Own account worker. A person who operates his or her own economic enterprise or engages independently in a profession or trade and hires no employees.

Total economically active population and activity rate, by sex. All persons of either sex who furnish the supply of labour for the production of economic goods and services during a specified time-reference period. The activity rate is the ratio of working people to the total population.

Unpaid family worker. A person who works a specified minimum amount of time without pay in an economic enterprise operated by a related person living in the same household.

TECHNICAL NOTE:

Difference observed over time or among countries may in part derive from variations in methodologies for data production that are employed by governments and agencies, e.g. census and surveys of households and establishments, from statistical methodologies for production of estimates and projections.

 UNDP, Human Development Report 1993 (Table 9).

Note: All percentage figures are expressed in relation to the male average, which is indexed to equal 100. The smaller the figure the bigger the gap, the closer the figure to 100 the smaller the gap, and a figure above 100 indicates that the female average is higher than the male.

Table C1. Estimates for female life expectancy at birth and female life expectancy as a percentage of male life expectancy in the ESCAP region, 1980, 1985 and 1993

Unit: Years and per cent

Country or Area	Female life expectancy at birth			Female life expectancy as a percentage of male life expectancy		
	1980	1985	1993	1980	1985	1993
Afghanistan	37.0	42.0	44.0	100.0	102.4	102.3
Australia	74.5	78.8	80.0	100.0	109.0	108.1

Source: United Nations, Women's Indicators and Statistics Microcomputer Database (WISTAT), Version 2 (1 May 1991).

Note: Female activity rates were computed by dividing the total active female population with the total female population and the quotient multiplied by 100. Data on total active female population and total female population were all taken from WISTAT 1991.

United Nations Statistical Office, New York, 1993.

Notes: ^aAustralia: On a national basis women, with the exception of Aboriginals, obtained the right to vote and stand for federal election when the Commonwealth Electoral Act of 1902 came into effect. However, women from the States of South Australia and Western Australia voted at the first federal election 1901 because the elections were held under the electoral laws of the several States. Aboriginal women received full franchise in the States of New South Wales, Victoria, South Australia and Tasmania and were given the right to enrol and vote at federal elections because the respective State electoral laws enabled them to do so. Aboriginals in Queensland and Western Australia were only entitled to enrol and vote if they were serving or had served as members of the Australian Defense Force. The first federal elections were held under the laws of the several states and the women of only South Australia and Western Australia voted at those elections. The Commonwealth Franchise Act of 1902 granted the franchise to all persons of the age of 21 years, and thus women voted at the first federal elections held under the Federal Law on 16 September 1903. ^bJapan: 17 December 1945, for elections to the House of Representatives and 24 February 1947 for elections to the House of Councilors.

^cNo woman so far.
