Introduction

The Committee on Statistics, at its sixth session in November 1985, decided that ESCAP should produce a statistical pocketbook containing principal series and key indicators for the region based on data already available within the secretariat. *Asia-Pacific in Figures* is the outcome of that decision.

Asia-Pacific in Figures is intended for those who need to know at a glance the basic features and trends in the region. The explanatory notes provided should facilitate an understanding of the data, which cover many important socio-economic aspects of development.

The data presented in this edition of *Asia-Pacific in Figures* refer to 55 countries or areas. Wherever possible, official government data have been used. Where official government figures are not available, the tables draw on data from the United Nations and other international sources.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Unless otherwise stated, "tons" related to metric tons, and "billion" signifies 1,000 million.

The following symbols, where they are used, indicate:

.	not applicable
...	not available
–	nil or negligible
P	provisional

Substantial breaks in the homogeneity of a series are indicated by a vertical line.

Explanatory notes

POPULATION STATISTICS

Total population. Unless otherwise specified, total population shown are midyear estimates (i.e., 30 June or 1 July) or are averages of year-end estimates, provided by national statistical offices. As far as possible, the population statistics presented are *de facto* (present-in-area).

Age distribution. Data were supplied by the Population Division of the Department for Economic and Social Information and Policy Analysis and the rates were computed in the ESCAP Statistics Division.

Rural residence. Classification of population by rural residence is provided by each country or area.

Annual crude rates of live births and deaths. Data refer to the number of live births or deaths per 1,000 population which occurred or were registered during the period indicated.

Rate of increase. The rate of increase is the annual percentage change in population size.

Density. Data refer to the number of persons in the total population per square kilometre of the total area.

SOCIAL STATISTICS

Infant mortality rate. The number of deaths under 1 year of age per 1,000 live births which occurred during the same period. Data exclude foetal deaths.

Expectation of life at birth. Defined as the average number of years expected to be lived by a newly-born baby, assuming a fixed schedule of age-specific mortality rates.

Adult literacy rate. Literacy rate refers to the percentage of adult population (age 15 years and over) who are able to read and write. Semi-literate persons who can read but not write are not included.

Primary school enrolment ratio. Data refer to gross enrolment ratio, which is the total enrolment of all ages divided by the population of the specific age groups, corresponding to the age group of primary school.

Population per physician. Physicians are persons who are graduates of a medical school or faculty, actually working in the country in any medical field.

Population per hospital bed. As a general rule, hospital establishments comprise the following: general and specialized hospitals and other medical establishments with beds, such as medical centres, bedded dispensaries etc., leprosaria, rehabilitation and physiotherapy centres, establishments for alcoholics, medical convalescence homes. Old people's homes and establishments for custodial and preventive care only are excluded.

Telephones used. Data refer to the number of telephones used per 1,000 population. Telephones refer to the number of public and private telephones installed which can be connected to a central exchange.

Television and radio receivers. Many countries report the number of radio licences issued rather than the number of receivers used. This has led to a certain under-enumeration of the number of receivers for those countries or areas where one licence covers the possession of several receivers. The same case applies to the figures supplied for the number of television receivers.

Daily calorie and protein supplies. Data refer to energy equivalent of per capita net food supplies available in the country per day. Food supplies comprise domestic production, imports less exports and changes in stocks. Net supplies exclude animal feed, seeds, quantities used in food processing and losses in distribution. The food requirement has been estimated on the basis of physiological needs for normal activity and health, taking into consideration environmental temperature, body weights, and age and sex distribution of the population in the various countries or areas, and allowing for wastes at the household level.

EMPLOYMENT

Population employed. The "employed" comprises all persons above a specified age who during the specified period of either one day or one week were working.

Population employed in agriculture. The agricultural sector comprises agriculture, forestry, hunting and fishing.

Female labour force. The number of women in the labour force as a percentage of the total labour force.

ENERGY

Commercial energy consumption. Data refer to the aggregate final consumption of coal and other solid fuels, petroleum products, gases and electricity, expressed in kilograms per capita of coal equivalent.

Energy imports as percentage of merchandise exports. Data refer to the dollar value of energy imports-Section 3 in the SITC, Revision 1 – and are expressed as a percentage of earnings from merchandise exports.

NATIONAL ACCOUNTS

Gross domestic product and per capita gross domestic product. Unless otherwise indicated, total and per capita gross domestic product are in purchasers' values. Gross domestic product in purchasers' values is defined as (a) the difference between the gross output value of resident producers minus the value of their intermediate consumption plus duties, (b) the sum of domestic factor incomes (i.e., compensation of employees and operating surplus), indirect taxes net of subsidies and consumption of fixed capital, (c) the sum of government and private consumption expenditure, gross capital formation in fixed assets and stocks and exports minus imports of goods and services.

EXTERNAL TRADE

Exports and imports of goods and services. Exports and imports of goods and services include broadly the equivalent of general exports and imports of merchandise as defined in external trade statistics, plus exports and imports of services and direct purchases abroad made by resident households and by the government on current account. Transfers of migrants' household and personal effects and gifts between households are also included. Exports are valued f.o.b., whereas imports are valued c.i.f., unless otherwise specified.

CENTRAL GOVERNMENT EXPENDITURE BY FUNCTION

Expenditure on various government functions expressed as a percentage of total government expenditure indicates public demand and government priorities attached to these functions. Components may not add to 100 per cent owing to rounding or unallocable adjustments.

FINANCE

Domestic saving is defined as the difference between current receipts and current disbursements.

Debt service of external long-term debt. Long-term debt refers to debt that has an original or extended maturity of over one year and that is owed to non-residents and repayable in foreign currency, goods or services. Debt service payment refers to actual repayments of principal (amortization) and payments of interest made in foreign currencies, goods or service in the year specified. Data also refer to public and publicly guaranteed long-term debt and private non-guaranteed debt except for some countries where data are not available.

Foreign exchange rate. Data refer to the units of national currency required to purchase one US dollar and pertain to the end-of-period quotation. For some countries or areas, mid-point rates (i.e., the average of buying and selling rates) are used.

PRODUCTION

Agricultural production index. The index of agricultural production covers all crops and livestock products of a country. The index numbers of food production cover commodities considered edible and containing nutrients. Thus coffee and tea, although edible, are excluded because they have no known nutritional value.

Industrial production index. Data refer generally to mining, manufacturing and electricity, gas and water and do not include construction unless otherwise indicated.

PRICES

Consumer price index numbers show the movement of the cost of selected goods and services that are considered representative of the consumption habits of the country as a whole. When the index refers to a city, it is so indicated.

Wholesale price index numbers measure changes in the level of commodity prices at a non-retail stage of distribution. Data usually represent a mixture of producer and wholesaler prices for domestic goods. The index may cover the prices of goods imported in quantity for the domestic market.

LAND USE

Total land area refers to total area, excluding area under inland water bodies. Inland water bodies generally include major rivers and lakes.

Arable land and land under permanent crops refer to land under temporary crops (double-cropped areas are counted only once), temporary meadows for mowing and pasture, land under market and kitchen gardens (including those cultivated under grass) and land temporarily fallow or lying idle, land cultivated with crops that occupy the land for long periods and do not need to be replanted after each harvest, land under shrubs, fruit trees, nut trees and vines. Excluded is land under trees grown for fuelwood or timber.

Irrigated area relates to areas purposely provided with water, including land flooded by river water for crop production or pasture improvement, whether this area is irrigated several times or only once during the year stated.

Forests and woodland refers to land under natural or planted stands of trees, whether productive or not, and includes land from which forests have been cleared but which will be reforested in the foreseeable future.

TRANSPORT

Passenger-kilometres. Figures for railways relating to passenger-kilometres include all passengers except military, government and railway personnel when carried without revenue. Figures for civil aviation relate to revenue scheduled traffic of the airline(s) registered in the country for total operations (international and domestic). Revenue scheduled traffic is traffic for which remuneration is received and which is carried on flights performed according to a published time-table.

Passenger vehicles in use. Passenger cars refer to vehicles seating not more than nine persons (including the driver), including taxis, jeeps and station wagons.

TOURISM

The number of tourists refers to persons travelling for pleasure, health, business, meetings, study (including students and young persons staying abroad) etc., and stopping for a period of 24 hours or more in a country (country of arrival other than that in which they usually reside). Data on tourist receipts are expressed in millions of US dollars.

UNITED NATIONS NATIONS UNIES

STATISTICAL PUBLICATIONS OF THE ESCAP SECRETARIAT

STATISTICAL YEARBOOK FOR ASIA AND THE PACIFIC, 1994

(E/F) Paperbound
Sales No. E/F.95.II.F.1 (ST/ESCAP/1488)

This twenty-sixth issue of a comprehensive compilation of statistical tables relating to the ESCAP region provides each country's data in a single section. Comprising 528 pages of statistical information, it shows 11 years of annual figures concerning population, manpower, national accounts, agriculture, industry, energy supplies, consumption, transport and communications, internal trade, external trade, wages, prices and household expenditure, finance and social statistics. Regional tables offer consolidated data in respect of the world, of the ESCAP region as a whole and of the developing countries or areas of ESCAP.

FOREIGN TRADE STATISTICS OF ASIA AND THE PACIFIC, 1988-1992

(E) Paperbound
Sales No. E/F.95.II.F.18 (ST/ESCAP/1469)

This issue provides, in time-series form and in country sequence, an analysis of the imports and exports of ESCAP reporting countries or areas for the years 1988-1992. The tables show import and export totals in United States dollars by countries of provenance and destination; imports and exports, by sections and groups of SITC Rev. 2; and a classification of trade by broad economic category.

ASIA-PACIFIC IN FIGURES, 1995

(E) Paperbound

This annual statistical publication contains selected socio-economic indicators relating to population, social statistics, employment, energy, national accounts, external trade, government expenditure, finance, production, prices, labour, transport and tourism concerning the countries or areas of the ESCAP region.

STATISTICAL INDICATORS FOR ASIA AND THE PACIFIC

(E) Paperbound

This publication provides monthly statistics for the assessment of demographic and economic trends. It includes series on population, vital rates, production, transport, internal trade, external trade, prices, finance and national accounts in selected countries or areas of the ESCAP region, accompanied by charts for some important series.

AD HOC PUBLICATIONS

DEVELOPMENT OF STATISTICAL ESTIMATING TECHNIQUES AND PROCEDURES AS A MEANS OF IMPROVING TIMELINESS OF DATA: REVIEW OF METHODOLOGICAL STUDIES IN SIX SELECTED COUNTRIES

This report documents experiences in improving timeliness and quality of statistical data through the adoption of improved statistical procedures and techniques. It summarizes some features of country studies and systematically analyses each country report within a common framework.

PURCHASING POWER PARITY AND QUANTITY COMPARISON FOR THE ESCAP REGION

This publication presents the Phase V results of the International Comparison Programme for the ESCAP regional comparison with 1985 as the reference year. It also provides information on the methodology adopted in computing purchasing power parities (PPP).

SOFTWARE DISTRIBUTED THROUGH ESCAP STATISTICS DIVISION

PEOPLE, Version 3.0

PEOPLE is a user-friendly software package for making national and sub-national population projections. It has been primarily designed for use in developing countries. It runs on any IBM or compatible PC running under MS-DOS. PEOPLE readily communicates with commercial spreadsheet, database and word-processing packages. Version 3.0 incorporates several new features; most notably the facility to make projections by single year calendar years, as well as for five year time periods. The user's manual has also been extensively rewritten to incorporate the numerous changes in the software.

WORKERS

WORKERS is a user-friendly microcomputer software package for making education, household and labour force projections, and can be used on IBM or compatible PCs running under MS-DOS. It has been designed for use in conjunction with the software package PEOPLE, described above. It has been developed as an application package to perform specific tasks, and to produce the results in a manner in which they can be readily understood and used in the developing countries.

كيفية الحصول على منشورات الامم المتحدة

يمكن الحصول على منشورات الامم المتحدة من المكتبات ودور التوزيع في جميع انحاء العالم . استعلم عنها من المكتبة التي تتعامل معها أو اكتب الى : الامم المتحدة ،قسم البيع في نيويورك او في جنيف .

如何购取联合国出版物

联合国出版物在全世界各地的书店和经售处均有发售。请向书店询问或写信到纽约或日内瓦的联合国销售组。

HOW TO OBTAIN UNITED NATIONS PUBLICATIONS

United Nations publications may be obtained from bookstores and distributors throughout the world. Consult your bookstore or write to: United Nations, Sales Section, New York or Geneva.

COMMENT SE PROCURER LES PUBLICATIONS DES NATIONS UNIES

Les publications des Nations Unies sont en vente dans les librairies et les agences dépositaires du monde entier. Informez-vous auprès de votre libraire ou adressez-vous à : Nations Unies, Section des ventes, New York ou Genève.

КАК ПОЛУЧИТЬ ИЗДАНИЯ ОРГАНИЗАЦИИ ОБЪЕДИНЕННЫХ НАЦИЙ

Издания Организации Объединенных Наций можно купить в книжных магазинах и агентствах во всех районах мира. Наводите справки об изданиях в вашем книжном магазине или пишите по адресу: Организация Объединенных Наций, Секция по продаже изданий, Нью-Йорк или Женева.

COMO CONSEGUIR PUBLICACIONES DE LAS NACIONES UNIDAS

Las publicaciones de las Naciones Unidas están en venta en librerías y casas distribuidoras en todas partes del mundo. Consulte a su librero o diríjase a: Naciones Unidas, Sección de Ventas, Nueva York o Ginebra.
