ESCAP

ECONOMIC AND SOCIAL COMMISSION FOR ASIA AND THE PACIFIC

Please open this flap for a listing of the selected indicators

ESCAP is the regional development arm of the United Nations and serves as the main economic and social development centre for the United Nations in Asia and the Pacific. Its mandate is to foster cooperation between its 53 members and 9 associate members. ESCAP provides the strategic link between global and country-level programmes and issues. It supports Governments of the region in consolidating regional positions and advocates regional approaches to meeting the region's unique socio-economic challenges in a globalizing world. The ESCAP office is located in Bangkok, Thailand. Please visit our website at www.unescap.org for further information.

The shaded areas of the map indicate ESCAP Members and Associate members.

Introduction

The Committee on Statistics, at its sixth session held in November 1985, decided that ESCAP should produce an annual statistical pocketbook containing principal series and key indicators for the region based on data already available within the secretariat. *Asia-Pacific in Figures,* the outcome of that decision, is now published for the nineteenth time.

Asia-Pacific in Figures is intended for those who need to know at a glance the basic features and trends in the region. The explanatory notes provided should facilitate an understanding of the data, which cover many important socio-economic aspects of development.

The data presented in this edition of *Asia-Pacific in Figures* refer to 58 regional members and associate members of ESCAP. Wherever possible, official government data have been used. Where official government figures are not available, the tables draw on data from the United Nations and other international sources.

For Hong Kong, China, the data for periods before 1 July 1997 are for the territory of Hong Kong.

For Macao, China, the data for periods before 20 December 1999 are for Macau.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Explanatory notes

Population

Total population and female population. Unless otherwise specified, figures shown are mid-year estimates (i.e., 30 June or 1 July) or averages of year-end estimates, provided by national statistical offices. As far as possible, the population statistics presented are de facto (present-in-area).

Age distribution. Data were provided by national statistical offices/the Population Division of the Department of Economic and Social Affairs and the rates were computed in the ESCAP Statistics Division.

Rural population. Classification of population by rural residence is provided by country or area. The definition of rural area can vary between countries/areas.

Crude birth rate and crude death rate. Data refer to the number of annual live births and deaths per 1,000 population which occurred or were registered during the period indicated.

Population growth rate. The rate of increase is the annual percentage change in population size.

Population density. Data refer to the number of persons in the total population per square kilometre of the surface area.

Health, education and culture

Infant mortality rate. The number of deaths of infants under one year of age in a given year per 1,000 live births in that year. Data exclude foetal deaths.

Life expectancy. Defined as the average number of years expected to be lived by a newborn baby, assuming a fixed schedule of age-specific mortality rates.

People per physician. Physicians are persons who are graduates of a medical school or faculty and are actually working in the country in a medical field.

Daily per capita protein and calorie supplies. Data refer to energy equivalent of per capita net food supplies available in the country per day. Food supplies comprise domestic production, imports less exports and changes in stocks. Net supplies exclude animal feed, seeds, quantities used in food processing and losses in distribution. The food requirement has been estimated on the basis of

physiological needs for normal activity and health, taking into consideration environmental temperature, body weight, and age and sex distribution of the population in the various countries or areas, and allowing for waste at the household level.

Adult literacy rate. Literacy rate refers to the percentage of adult population (age 15 years and over) who are able to read and write. Semi-literate persons who can read but not write are not included.

Primary school gross enrolment rate. Data refer to gross enrolment ratio, which is the total enrolment of all ages divided by the population of the specific age groups corresponding to the primary school age group. The ratio may exceed 100 if the actual age distribution of pupils extends beyond the official school ages.

Daily newspaper circulation. A newspaper is considered to be "daily" if it appears at least four times a week.

Telephone main lines and mobile phone subscribers. Telephone main lines refer to the number of main lines in operation. Main telephone lines refer to the telephone lines connecting a customer's equipment to the public switched-telephone network (PSTN) and which have a dedicated port on a telephone exchange. Mobile phone subscribers refer to subscribers of portable telephones subscribing to an automatic public mobile telephone service using cellular technology which provides access to the PSTN.

Television receivers. Data refer to the number of all types of television receivers in use, for receiving broadcasts to the general public, including those connected to cable distribution systems. Private sets installed in public places and communal receivers are included.

Internet users. Data are based on reported estimates, derivations based on reported Internet Access Provider subscriber counts, or calculated by multiplying the number of hosts by an estimated multiplier. However, comparisons of user data can be misleading because there is no standard definition of frequency (e.g., daily, weekly, monthly) or services used (e.g., e-mail, World Wide Web).

National accounts and prices

Gross domestic product at constant 1990 prices. Data on national accounts refer to the summary data for national accounts compiled according to the System of National Accounts (SNA). Unless otherwise indicated, total and

per capita gross domestic product are in purchasers' values. Gross domestic product in purchasers' values is defined as (a) the difference between the gross output value of resident producers minus the value of their intermediate consumption plus duties, (b) the sum of domestic factor incomes (i.e., compensation of employees and operating surplus), indirect taxes net of subsidies and consumption of fixed capital, and (c) the sum of government and private consumption expenditure, gross capital formation in fixed assets and stocks and exports minus imports of goods and services.

Private consumption at constant 1990 prices measures the expenditure of all resident non-government units, which includes all households and private non-profit institutions serving households.

Domestic saving. Defined as the difference between current receipts and current disbursements.

Gross domestic product per capita in United States dollars is derived by converting the national currency into United States dollars based on the average official exchange rates for the period. The official exchange rate might differ significantly from market exchange rates.

External debt. Data refer to total debt stocks. This is defined as the sum of public and publicly guaranteed long-term debt, private non-guaranteed long-term debt, the use of International Monetary Fund credit, and short-term debt.

Consumer price and consumer food price indices show the movement of the cost of selected goods and services that are considered representative of the consumption habits of the country as a whole. When the indices refer to a city, it is so indicated.

Wholesale price index measures changes in the level of commodity prices at a non-retail stage of distribution. Data usually represent a mixture of producer and wholesaler prices for domestic goods. The index may cover the prices of goods imported in quantity for the domestic market.

Trade, transport and tourism

Exports and imports of merchandise trade refer to international merchandise trade, which includes as far as possible, all goods which add to or subtract from the material resources of a country as a result of their movement into or out of the country. Thus, ordinary commercial transactions, government trade (including foreign aid, war reparations and trade in military goods), postal

trade and all kind of silver (except silver coins after their issue), are included in the statistics. Since their movement affects monetary rather than material resources, monetary gold, and currency and titles of ownership after their issue into circulation, are excluded.

Passenger cars in use. Passenger cars refer to vehicles seating not more than nine persons (including the driver), including taxis, jeeps and station wagons.

Railway and air passenger travel. Railway and air passenger travel is defined in passenger-kilometres. Railway passengers include all passengers except military, government and railway personnel when carried without revenue. Air passenger travel relates to revenue scheduled civil aviation traffic of the airlines registered in the country for total operations, international and domestic, for which remuneration is received.

Tourist arrivals refer to persons travelling for pleasure, health, business, meetings, study (including students and young persons studying abroad), etc., and stopping for a period of 24 hours or more in a country (country of arrival other than that in which they usually reside).

Tourist revenue refers to the receipts of a country in the form of consumption expenditure, i.e., payments for goods and services made by foreign visitors.

Finance

Government revenue. Data refer to all non-repayable government receipts, whether requited or unrequited, other than grants; revenue is shown net of refunds and other adjustment transactions.

Government expenditure. Data for government expenditure and expenditure of education, health and economic affairs and services refer to all non-repayable payments by government, whether requited or unrequited and whether for current or capital purposes.

Money supply: money and quasi-money (M2). Money equals the sum of currency outside deposit money banks and demand deposits other than those of the central government. Quasi-money equals the sum of time, savings and foreign currency deposits of resident sectors other than central government. The data on money are frequently referred to as M1, while the sum of M1 and quasi-money gives a broader measure of money similar to that which is frequently called M2.

International reserves minus gold. Data refer to the United States dollar value of monetary authorities holdings of special drawing rights (SDRs), reserve position in the International Monetary Fund, foreign exchange and the sum of these items, which is total reserves minus gold.

Lending rate is the bank rate that usually meets the short- and medium-term financing needs of the private sector. The rate is normally differentiated according to the creditworthiness of borrowers and objectives of financing.

Exchange rate. Data refer to the units of national currency required to purchase one United States dollar and pertain to the period average. For some countries or areas, mid-point rates (i.e., the average of buying and selling rates) are used.

Labour force and production

Population employed. Data refer to all persons above a specified age who, during the specified period of either one day or one week, were working.

Population employed in agriculture. The proportion of people employed in agriculture, forestry, hunting and fishing as a percentage of the total labour force.

Female labour force. The proportion of women in the labour force as a percentage of the total labour force.

Agricultural production, food production and non-food agricultural production indices are based on the sum of price-weighted (international prices) quantities of commodities produced. The index of agricultural production covers all crops and livestock products of a country. The index of food production covers commodities considered edible and containing nutrients. Thus coffee and tea, although edible, are excluded because they have no known nutritional value.

Industrial production index. Data refer generally to mining, manufacturing and electricity, gas and water, and do not include construction unless otherwise indicated.

Commercial primary energy production. Included in the production of commercial primary energy for solids are hard coal, lignite, peat and oil shale; liquids are comprised of crude petroleum and natural gas liquids; gas comprises natural gas; and electricity is comprised of primary electricity generation from hydro, nuclear, geothermal, wind, tide, wave and solar sources.

Natural resources and environment

Commercial primary energy consumption per capita. Data refer to the consumption of commercial energy for solids, liquids, gases and electricity.

Carbon dioxide emissions. Data are calculated by the Carbon Dioxide Information Analysis Center located at the Oak Ridge National Laboratory. National emissions of CO_2 from industrial sources are derived from United Nations consumption data for gas, liquid and solid fuels plus cement manufacturing and gas flaring statistics, to which appropriate emission factors have been applied. Emissions are in units of 1,000 metric tons of carbon; to convert carbon into carbon dioxide, multiply data by 0.272756.

Total land area. Data refer to total area, excluding area under inland water bodies. Inland water bodies generally include major rivers and lakes. (1,000 hectares = 10 square kilometres).

Arable land and land under permanent crops. Data refer to land under temporary crops (double-cropped areas are counted only once), temporary meadows for mowing and pasture, land under market and kitchen gardens (including those cultivated under grass) and land temporarily fallow or lying idle, land cultivated with crops that occupy the land for long periods and do not need to be replanted after each harvest, land under shrubs, fruit trees, nut trees and vines. Excluded is land under trees grown for fuelwood or timber.

Irrigated area. Data refer to areas purposely provided with water, including land flooded by river water for crop production or pasture improvement, whether this area is irrigated several times or only once during the year stated.

Non-arable land and land not under permanent crops. Data refer to any other land not specifically listed under arable land and land under permanent crops. This may refer to areas such as permanent meadows and pastures, forests and woodland, built-on areas, roads and barren land.

Human development index

The ***human development index (HDI)*** is compiled by the United Nations Development Programme (UNDP). It is a composite index measuring the average achievements in three basic dimensions of human development: longevity, educational attainment and a decent standard of living. Performance in each dimension is expressed by a value between 0 and 1 by applying the following general formula:

$$\text{Dimension index} = \frac{[\text{Actual value} - \text{Minimum value}]}{[\text{Maximum value} - \text{Minimum value}]}$$

For details on how the HDI is calculated, see the technical notes in the *UNDP Human Development Report 2005*, or the website <http://www.undp.org/hdro>.

SYMBOLS

Unless otherwise stated, reference to "tons" indicates metric tons, and the term "billion" signifies a thousand million.

The following symbols are used in the tables:

. . not applicable
. . . not available
- nil or negligible

Substantial breaks in the homogeneity of a series are indicated by a vertical line.

1. Since August 2000, the "resident population" approach was adopted in place of the "extended de facto" approach for compiling Hong Kong population figures. 2. Including students enrolled in special education programmes. 3. Including households with more than one television set. 4. Visitor arrivals; including non-Macaonese arrivals via Macao, China and visitors from China. 5. Enhanced methodology in line with standard industry practices is used. 6. Year beginning 1 April. 7. Base: 1983-1987 = 100.

STATISTICAL PUBLICATIONS OF THE ESCAP SECRETARIAT (as at October 2006)

STATISTICAL YEARBOOK FOR ASIA AND THE PACIFIC, 2004
(E/F) Paperbound
Sales No. E/F.05.II.F.1 (ST/ESCAP/2373)

This thirty-sixth issue of a comprehensive compilation of statistical tables relating to the ESCAP region provides each country's data in a single section. Comprising 700 pages of statistical information, it shows 10 years of annual figures concerning population, manpower, national accounts, agriculture, fertilizer, industry, energy supplies, transport and communications, external trade, wages and prices, finance and social statistics. Regional tables offer consolidated data in respect of the world, of the ESCAP region as a whole and of the developing countries or areas of the ESCAP region.

ASIA-PACIFIC IN FIGURES, 2005
(E) Paperbound
Sales No. E.06.II.F.29 (ST/ESCAP/2427)

This annual statistical publication contains selected socio-economic indicators relating to population, employment, energy, national accounts, external trade, government finance, international finance, production, prices, land use, transport, tourism and social statistics concerning the countries or areas of the ESCAP region.

STATISTICS DIVISION WEBSITE http://www.unescap.org/stat/

Information on statistical publications and a limited volume of statistical data are available on the ESCAP Statistics Division website. The website also contains information on technical and legislative meetings and activities organized by the Statistics Division of ESCAP, including papers presented to and reports of meetings since the mid-1990s. National statistical offices in the region are listed, with hyperlinks where available. Selected highlights:

Online data

ESCAP Data Centre <http://www.unescap.org/stat/data/> provides links to all major statistical data holdings of the secretariat.

Statistical Indicators for Asia and the Pacific online publication <http://www.unescap.org/stat/data/statind/> provides monthly statistics for the assessment of demographic and economic trends. It includes series on population, industry, transport, internal trade, external trade, prices and finance in selected countries or areas of the ESCAP region, accompanied by charts for some important series. The data content may vary from country to country depending on the availability of monthly series.

Statistical Newsletter

This newsletter, published quarterly by the Statistics Division, is available on line at <http://www.unescap.org/stat/nl/newlet.asp> and contains information on activities of the Statistics Division and those of international organizations and member countries and areas.

MDGs IN ASIA AND THE PACIFIC WEBSITE http://mdgasiapacific.org

Includes a regional MDG indicator database, http://www.unescap.org/stat/mdgdb/, and regional progress reports and technical papers, some with extensive statistical data and analyses.

AD HOC PUBLICATIONS

A future within reach: Reshaping institutions in a region of disparities to meet the Millennium Development Goals.
ST/ESCAP/2376

The report produced under a tripartite initiative between ESCAP, the United Nations Development Programme (UNDP) and the Asian Development Bank (ADB) is intended to provide government policy makers and other development stakeholders with the most comprehensive and up-to-date assessment of the region's progress towards the MDGs. The regional report was published in October 2005 and a separate update of the first chapter on the region's progress towards the MDGs was published in September 2006.

GENDER EQUALITY AND EMPOWERMENT: A STATISTICAL PROFILE OF THE ESCAP REGION
<http://www.unescap.org/stat/statpub/gender_profile_publication.pdf>

The current gender situation in the Asia-Pacific region is described through a small set of statistical indicators. Insight into individual indicators across the region can be obtained from the dataset in comparative tables.

INTEGRATING UNPAID WORK INTO NATIONAL POLICIES
Sales No. E.03.II.F.14 (ST/ESCAP/2236)

This guidebook has been developed jointly by the Statistics Division of ESCAP, the United Nations Development Programme (UNDP) and the United Nations Development Fund for Women (UNIFEM). It provides a toolbox to help improve the collection, analysis and utilization of data and statistics on unpaid work to ensure more relevant policymaking and programming.

Indicator	Unit	
Population		
Total population	Millions	(1)
Female population	Percentage of total	(2)
Population aged 0-14	Percentage of total	(3)
Population aged 15-64	Percentage of total	(4)
Population aged 65 and over	Percentage of total	(5)
Rural population	Percentage of total	(6)
Crude birth rate	Per 1,000 people	(7)
Crude death rate	Per 1,000 people	(8)
Population growth rate	Per cent per annum	(9)
Population density	People per square kilometre	(10)
Health, education and culture		
Infant mortality rate	Per 1,000 live births	(11)
Life expectancy	Years: males/females	(12)
People per physician	Number	(13)
Daily per capita protein supply	Grams	(14)
Daily per capita calorie supply	Calories	(15)
Adult literacy rate	Percentage: males/females	(16)
Primary school gross enrolment rate	Percentage: males/females	(17)
Daily newspaper circulation	Thousands	(18)
Telephone main lines and mobile phone subscribers	Per 100 people	(19)
Television receivers	Per 1,000 people	(20)
Internet users	Per 100 people	(21)
National accounts and prices		
Gross domestic product at constant 1990 prices	Millions of US dollars	(22)
Private consumption at constant 1990 prices	Millions of US dollars	(23)
Domestic saving	Percentage of GDP	(24)
GDP per capita	US dollars	(25)
External debt	Millions of US dollars	(26)
Consumer price index	2000 = 100	(27)
Consumer food price index	2000 = 100	(28)
Wholesale price index	2000 = 100	(29)
Trade, transport and tourism		
Exports of merchandise trade	Millions of US dollars	(30)
Imports of merchandise trade	Millions of US dollars	(31)
Passenger cars in use	Thousands	(32)
Railway passenger travel	Millions of passenger-kilometres	(33)
Air passenger travel	Millions of passenger-kilometres	(34)
Tourist arrivals	Thousands	(35)
Tourist revenue	Millions of US dollars	(36)
Finance		
Government revenue	Millions of national currency	(37)
Government expenditure	Millions of national currency	(38)
Government education expenditure	Percentage of total expenditure	(39)
Government health expenditure	Percentage of total expenditure	(40)
Government economic affairs and services expenditure	Percentage of total expenditure	(41)
Money supply: money and quasi-money (M2)	Billions of national currency	(42)
International reserves minus gold	Millions of US dollars	(43)
Lending rate	Per cent per annum	(44)
Exchange rate	National currency per US dollar	(45)
Labour force and production		
Population employed	Thousands	(46)
Population employed in agriculture	Percentage of population employed	(47)
Female labour force	Percentage of labour force	(48)
Agricultural production index	1999-2001 = 100	(49)
Food production index	1999-2001 = 100	(50)
Non-food agricultural production index	1999-2001 = 100	(51)
Industrial production index	1995 = 100	(52)
Commercial primary energy production	Thousand tons of oil equivalent	(53)
Natural resources and environment		
Commercial primary energy consumption per capita	Kilograms of oil equivalent	(54)
Carbon dioxide emissions	Thousand tons of carbon dioxide	(55)
Total land area	Thousands of hectares	(56)
Arable land and land under permanent crops	Thousands of hectares	(57)
Irrigated area	Thousands of hectares	(58)
Non-arable land and land not under permanent crops	Thousands of hectares	(59)
Human development index		
Human development index	Value of the composite index	(60)
